

# SURGERY Consent Form

Procedure: \_\_\_\_\_

Like you, our greatest concern is the well-being of your pet. Before putting your pet under anesthesia, we will perform a full physical examination. However, many conditions, including disorders of the liver, kidneys, or blood, are not detected unless blood testing is performed. Such tests are important before any kind of surgery.

For these reasons, we do a blood screening before such procedures. These tests are important and help ensure the health and safety of your pet before anesthesia is employed.

It is important to understand that a pre-anesthetic/Complete Blood Count profile does not guarantee the absence of anesthetic complications. It may, however, greatly reduce the risk of complications as well as identify medical conditions that could require medical treatment in the future.

## CPR Status Authorization

[ ] CPR - **I DO** wish the staff to perform resuscitation (CPR) on my pet if my pet suffers from cardiac arrest, respiratory arrest, collapse or unconsciousness.

- I accept that if the hospital staff is unable to reach me within 20 minutes after the initial CPR procedures, and after exercising reasonable medical judgment, determine that there is no hope for success, the staff will cease further CPR procedures. I understand that despite the best efforts of the veterinarians and staff at this facility, even the most successful CPR that may restore my pet's life may not allow for my pet to regain his/her normal mental and physical health.

- If I request such emergency procedures, I agree to be held responsible for veterinary services provided to my pet while staff members pursue treatment and try to reach me for further directions. Regardless of my pet's recovery or survival, I agree to pay CPR fees in addition to other fees already identified by the practice and agreed upon by me.

[ ] DNR - **I DO NOT** wish the staff to perform CPR on my pet. I understand that if my pet suffers from cardiac arrest, respiratory arrest, or collapse, my pet will pass away if CPR is not performed.
